

# RapidDeploy and Critical Response Group

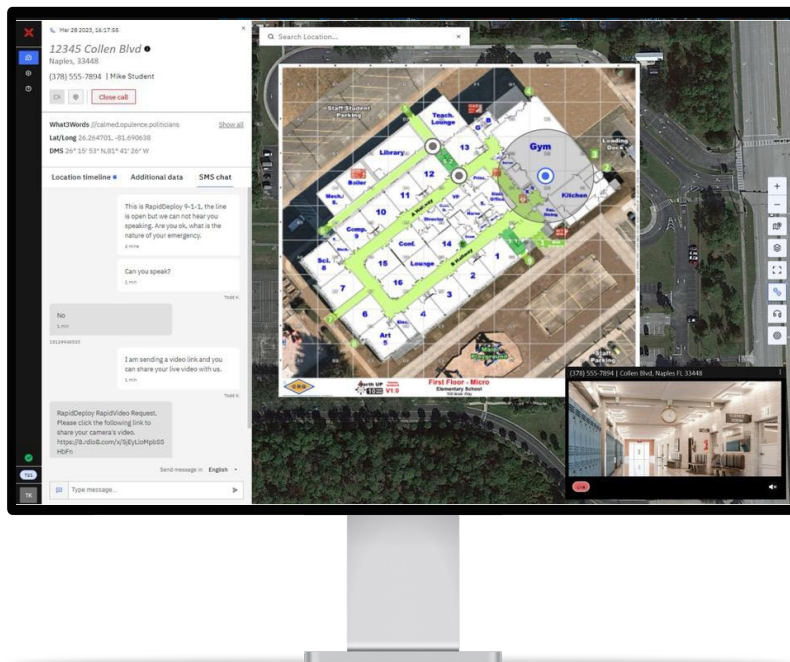

## Indoor Mapping Intelligence for Faster Emergency Response

### RapidDeploy Radius Mapping Improves Emergency Response

As the leading cloud-native Next Generation primary call taking map, Radius Mapping connects real-time 911 data, communications and critical information in a single call-taking map.

Our unified map transforms the way telecommunicators engage with callers, reducing response time, enhancing situational awareness, and driving better emergency response outcomes.

#### Indoor CRG Map in Radius Mapping

### Indoor Mapping Intelligence for Faster Emergency Response

RapidDeploy's Radius Mapping integrates with Critical Response Group's high-fidelity indoor maps—giving 911 telecommunicators and first responders the power to see exactly where an incident is happening, room by room, in real time. This enables responders to act faster, navigate smarter, and respond with confidence.

Seamlessly embedded inside RapidDeploy's Radius Mapping and Lightning app, CRG's high-fidelity indoor maps deliver unmatched visibility into schools, hospitals, and critical infrastructure. CRGs display labeled floor plans, responder locations, and dynamic overlays—turning raw 911 data into a clear, actionable scene.

#### CRG Embedded in Radius Mapping:

- Works with existing infrastructure
- 50,000+ CRGs created nationwide
- Designed for high-stress emergency use

# RapidDeploy and CRG: One Operational Picture from Call Center to Field

## Room-Level Awareness

Visualize caller and responder locations on standardized, labeled floor plans in real-time.

## Overlays & Feeds

Overlay camera feeds, sensor data, and alerts for a full operational view of the incident scene.

## Responder Tracking

Track responders directly inside mapped facilities.

## No App Switching

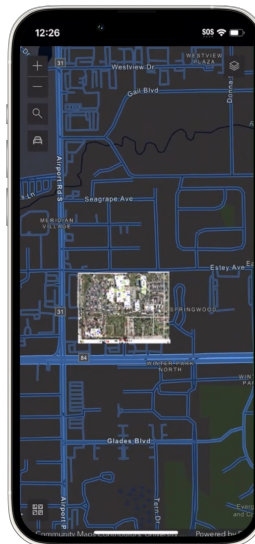

CRGs appear instantly in Radius Mapping and Lightning mobile app.

Fully integrated safety solution that helps 911 centers, school security, and first responders stay aligned and act fast.

As school safety legislation expands nationwide—such as Alyssa’s Law and school emergency mapping mandates—RapidDeploy and Critical Response Group (CRG) provide a modern solution that goes beyond compliance.

By embedding CRG’s high-fidelity, labeled indoor maps directly into RapidDeploy’s Radius Mapping and Lightning mobile apps, emergency responders can:

- Instantly visualize building layouts with room labels, exits, and AED locations
- Track caller and responder movement inside schools in real time
- Merge panic button signals and voice calls with precise indoor locations
- Receive live video or silent texts from students or staff during a crisis

Empowering Safer Schools  
with CRG and RapidDeploy
